Landscape Love Observation Form

(to be taken by Master Gardener for home visit notes/observations).

HOMEOWNER NAME:

1. TREE/SHRUB DISEASE DIAGNOSTIC EVALUATION

Plant:

Cultivar/Variety

Problem Description/Observation:

Affecting more than one plant in area: yes no

Exposure: full sun partial shade full shade

Systems First Noticed (date) appeared last year yes no

Number of years in present site

Soil Conditions: normal (loose & friable) compacted amended raised

Terrain: sloped level low

Drainage: good moderate poor

Part of Plant Affected: roots crown stem/branch leaves flower

General Appearance: wilted yellowed stunted stained/streaked leaf spot/blight
leaf mottled

Other explain:

Visible insects yes no insect ID?

Disease Distribution general scatter in spots or groups certain cultivars in low
areas upland areas

Other; explain

Fungicide/Insecticide sprayed? What When

Comments:
